# SnowQuik™ 1.3 Series

## Liquid $CO_2$ Snow Generators

## KEY BENEFITS

- Simple, Compact, Versatile, Rugged, Economical snowmaker that generates approximately 300+ g of snow in 1 minute for ISBT / CGA specified tests.

- C-Model is specifically designed for hands-free use in CGA or ISBT methods for non-volatile residue (NVR), non-volatile organic residue (NVOR) & sensory tests from Liquid $CO_2$.

- 6 ft. (3 m) x 1/4 inch stainless steel braided, flexible PTFE lined transfer line with 1900 psig (13,100 kPag) pressure relief device for operational convenience and safety.

- Full flow high pressure / low temperature quick connect fittings allow for **tool-free** source connections.

## TYPICAL APPLICATIONS

- ISBT Method 1.3
  Carbon Dioxide Sampling Using Snow Generators and Containers

- ISBT Method 8.0
  Total Non-Volatile and Non-Volatiles Organic Residues by Gravimetry

- ISBT Method 15.0
  Odor of Carbon Dioxide Snow

## MODELS

- **SnowQuik-1.3B**
  Hand held snow generator with quick connect pressure relief assembly for easy, convenient storage tank, tank truck, rail car, or minibulk tank sampling.

- **SnowQuik-1.3C**
  Trigger Clamp with quick connect pressure relief assembly inlet fitting for safe *Hands-Free* snow sample generation from storage tanks, tank trucks, or minibulk tanks.

### SnowQuik-1.3B

Female QC
w/ dust plug
(QCF Dust Plug)

Fiberless, Synthetic
Snowbag
(Snowbag White)

### SnowQuik-1.3C

## RECOMMENDED ACCESSORIES

Digital Scale
(DS-2KG)

1L Polished NVR Can
(NVR 1.0L)

Cryo-Safety Gloves
(CRYGLV-14L)

**Airborne Labs International**

**ISO / IEC 17025:2005 Accredited Laboratory**
